

INERATEC recognized on the 2025 Global Cleantech 100 List

Karlsruhe, Deutschland, January 16, 2025 – INERATEC, a pioneer in Power-to-X technology and the production of carbon-neutral e-Fuels and base chemicals, is proud to announce its inclusion on the Cleantech Group's 2025 Global Cleantech 100 list. This annual list, now in its 16th year, highlights the world's most promising private cleantech companies driving impactful innovation for a sustainable future.

The Global Cleantech 100 report introduces trailblazing companies advancing technologies and business models to combat climate and environmental challenges. The recognition places INERATEC among leading innovators transforming energy systems and accelerating the shift toward a net-zero economy.

"Being named to the Global Cleantech 100 list for the second year in a row reaffirms INERATEC's commitment to delivering innovative solutions for a sustainable energy supply," stated Tim Boeltken, INERATEC's CEO. "Our breakthrough e-Fuels technology is paving the way for the next era of mobility. It offers a viable path to defossilize transportation and industry on a global scale."

The cleantech sector is set to reach pivotal milestones in 2025 as market forces intensify and innovation accelerates. Economic viability, first-of-a-kind projects, and the surging demand for climate adaptation technologies are shaping a new era of sustainability. Such a first-of-a-kind (FOAK) plant in Frankfurt, Germany to make e-Fuels available at commercial scale. With projects like this, INERATEC continues to lead in scaling Power-to-X technologies, contributing to the development of real-world solutions for decarbonizing energy-intensive sectors.

About INERATEC:

INERATEC is a pioneer in the field of Power-to-Liquid applications. The company supplies sustainable e-Fuels as well as chemical products. Modular chemical plants for Power-to-X and gas-to-liquid applications use hydrogen from renewable electricity and greenhouse gases such as CO₂ to produce e-SAF, CO₂-neutral gasoline, clean diesel or synthetic waxes, methanol or SNG. Founded in 2016, INERATEC has already implemented industrial-scale power-to-liquid plants at German sites to boost the availability of sustainable fuels and chemicals in various transport sectors such as aviation.
